Chief & Council, and Community Technician

RE: Bell Broadband Upgrades Phase 1 Beginning August 28-Sept 1, 2023

Thank you for your continued support of the head end 10Gbps broadband upgrade project. KNet has been working with community technicians to begin upgrades of the main head end broadband equipment. Thank you for hosting Brad Woodworth (Woody) and the KNet team in your communities to setup up racks, cable routers and UPS batteries, and confirming head end electrical and HVAC building needs.

We have been notified by Bell that they plan to visit the communities August 28 – September 1, 2023 to begin assessments for their upgrades. It is Bell's practice to land a helicopter at the head end for a few hours and complete their work in the Bell building. We have limited information regarding Bell's travel schedule and flight plans, however please let us know if you have questions.

We are excited to work through the stages of the upgrades with your community technicians. More information will follow as we confirm the project timeline and how soon your community can place an order for increased broadband speeds.

Meegwetch,

KNet Director,
Jesse Fiddler
